

Announcement! Announcement!

WEF is hosting a digital contest for students of all ages to submit their very own **Water Palooza Video**! Visit <https://www.wef.org/wp-resources> to enter and for more details

In order to help friends and neighbors understand the importance of water in their lives, please put together a brief video addressing one of the topics below;

- **What Not to Flush?** What we flush down our drains impacts the world we live in. In a brief video, show us some of the things that shouldn't be flushed down the toilet.
- **How do we get water?** People need to share water in order to survive. In a brief video, show us how you get your water, where it comes from and some ways how you can minimize wasting water.
- **Where does the water go?** There are many ways to filter and replenish our water. In a brief video, show us a few ways to clean our water.

Your video will be judged by a panel of elite water specialists. Please be sure to follow the guidelines below for your video submission:

DURATION	45 seconds or less
CONTENT	Honest & Informative

Direct Link for Video Submission: <https://wef.secure-platform.com/a/solicitations/103/home>

For any additional questions, please contact:

Water Palooza

Online Video Contest

Submit a 45 second video addressing one of the following:

Water-Focused:

- Games
- Video Lessons
- Crafts
- Coloring Pages
- Experiments

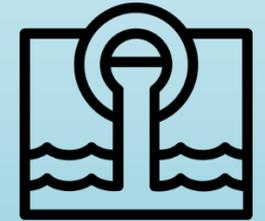

What Not to Flush?

What we flush down our drains impacts the world we live in. In a brief video, show us some of the things that shouldn't be flushed down the toilet.

How Do We Get Water?

People need to share water in order to survive. In a brief video, show us how you get your water, where it comes from and some ways how you can minimize wasting water.

Where Does the Water Go?

The Earth has many ways to filter and replenish our water resources. In a brief video, show us a few ways the Earth cleans our water resources.

Water Palooza is an annual event hosted by WEF and a local school to promote education in the water environment fields. This year's event is a little unconventional. We've focused our efforts on developing a completely online repository for educational resources that students and teachers can use to promote these important topics.
